1. Introduction

1.1: About Sure Survive

Sure Survive is a leading brand in outdoor safety gear, dedicated to providing high-quality and reliable products for outdoor enthusiasts, hikers, campers, and emergency responders. With a focus on durability and functionality, Sure Survive products are designed to withstand the toughest outdoor conditions while keeping users safe and prepared for any situation.

1.2: Product Overview

The Sure Survive Emergency Beacon Light is a vital tool for anyone venturing into the great outdoors. Whether you're hiking, camping, or in an emergency situation, this waterproof and long-lasting beacon light will keep you visible and safe. With multiple flash modes to choose from, you can maximize your visibility in any outdoor environment, making it an essential addition to your outdoor safety kit.

2. Getting Started

2.1: Unpacking Your Emergency Beacon Light

Upon opening the package, you will find the following items:

- Emergency Beacon Light
- User Manual
- Lanyard

Please ensure that all items are included before discarding any packaging materials. If any items are missing or damaged, please contact Sure Survive customer service immediately.

2.2: Battery Installation

To insert the battery into your Emergency Beacon Light, follow these steps:

1. Unscrew the battery compartment cover located at the bottom of the device by turning it counterclockwise.
2. Insert the AA battery into the compartment, ensuring that the positive (+) and negative (-) ends match the corresponding indicators inside the compartment.
3. Screw the battery compartment cover back on by turning it clockwise until it is securely fastened.

Caution: Always use a new, high-quality AA battery to ensure optimal performance. Avoid mixing different types of batteries or using old and new batteries together.

3. Operating Instructions

3.1: Turning the Beacon Light On and Off

To turn on the Emergency Beacon Light, locate the power button on the top of the device. Press and hold the power button for 3 seconds until the indicator light turns on. To turn off the beacon light, press and hold the power button for 3 seconds until the indicator light turns off.

3.2: Selecting Flash Modes

The Emergency Beacon Light offers multiple flash modes to ensure maximum visibility in any outdoor situation. To cycle through the flash modes, press the mode button located next to the power button. The available flash modes are as follows:

1. **Steady On:** Produces a continuous light for steady visibility. Press the mode button once to activate this mode.
2. **Slow Flash:** Emits a slow, intermittent flash for enhanced visibility. Press the mode button again to switch to this mode.
3. **Rapid Flash:** Provides a rapid, strobe-like flash for maximum attention. Press the mode button one more time to activate this mode.

To turn off the beacon light, press and hold the mode button for 3 seconds until the indicator light turns off.

4. Maintenance

4.1: Replacing the Batteries

To ensure your Sure Survive Emergency Beacon Light is always ready when you need it, it's important to replace the batteries regularly. Follow these simple steps to replace the batteries:

1. Unscrew the battery compartment cap located at the bottom of the beacon light.
2. Remove the old batteries and dispose of them properly.
3. Insert new batteries according to the polarity indicators inside the battery compartment.
4. Replace the battery compartment cap and screw it tightly to ensure it is properly sealed against water.

Note: The Sure Survive Emergency Beacon Light requires [three AAA batteries](#) (not included).

4.2: Cleaning and Storage

Proper cleaning and storage of your Sure Survive Emergency Beacon Light will help prolong its lifespan and ensure it is ready for use when needed. Follow these guidelines for cleaning and storage:

4.2.1: Cleaning

1. Use a soft, damp cloth to wipe down the exterior of the beacon light, removing any dirt or debris.
2. If the beacon light has been exposed to saltwater or other corrosive substances, rinse it with fresh water and dry thoroughly.
3. Do not use harsh chemicals or solvents to clean the beacon light, as this may damage the housing or seals.

4.2.2: Storage

1. Ensure the beacon light is completely dry before storing to prevent corrosion or damage.
2. Store the beacon light in a cool, dry place away from direct sunlight and extreme temperatures.

3. If the beacon light will not be used for an extended period, remove the batteries to prevent corrosion and leakage.

By following these maintenance guidelines, you can ensure that your Sure Survive Emergency Beacon Light is always ready to provide maximum visibility in any outdoor situation.

5. Safety Information

5.1: General Safety Precautions

When using the Sure Survive Emergency Beacon Light, please keep the following safety precautions in mind:

1. Do not look directly into the light when it is on, as it may cause temporary discomfort or disorientation.
2. Always handle the light with dry hands to prevent the risk of electric shock.
3. Keep the light away from small children and pets, as it contains small parts that may pose a choking hazard.
4. Do not disassemble the light, as it may damage the internal components and void the warranty.
5. Store the light in a cool, dry place when not in use to prevent damage from extreme temperatures.

5.2: Waterproof Usage

The Sure Survive Emergency Beacon Light is designed to withstand wet conditions, but it is important to follow these guidelines to ensure proper waterproof usage:

1. Before use, ensure that the battery compartment is securely closed to prevent water from entering the light.
2. Do not submerge the light in water deeper than the maximum immersion depth indicated in the specifications. Doing so may cause damage to the internal components.
3. After using the light in wet conditions, carefully dry the exterior with a clean cloth to prevent corrosion and maintain optimal performance.
4. If the light becomes submerged in water, do not use it until it has been thoroughly dried and inspected for any damage.

6. Troubleshooting

6.1 Common Issues

If you are experiencing issues with the Sure Survive Emergency Beacon Light, please refer to the following common issues and their potential solutions:

1. The beacon light is not turning on

- Ensure that the batteries are properly installed and fully charged. Refer to section 4.1 for instructions on how to install the batteries.
- Check the battery contacts for any corrosion or debris and clean if necessary.
- If the battery contacts are clean and the batteries are properly installed, try replacing the batteries with new ones.

2. The beacon light is not flashing

- Make sure that you have selected a flash mode by pressing the mode button (refer to section 3.2 for instructions on selecting flash modes).
- If the mode button is not responding, the beacon light may need to be reset. To reset the beacon light, remove the batteries for 30 seconds and then reinsert them.

3. The beacon light is flashing irregularly

- If the beacon light is flashing irregularly, it may be due to low battery power. Replace the batteries with new ones and ensure they are fully charged.

4. The beacon light casing is damaged or cracked

- If the casing of the beacon light is damaged or cracked, do not use the product. Contact Sure Survive customer support for assistance.

6.2 Contacting Customer Support

If you have attempted to troubleshoot the issues with the Sure Survive Emergency Beacon Light and are still experiencing problems, please contact our customer support team for further assistance. You can reach our customer support team by:

- Phone: 1-800-SURVIVE
- Email: support@suresurvive.com

- Online form: Visit our website at www.suresurvive.com and fill out the contact form with your inquiry.

Please have the product name, model number, and any relevant details about the issue ready when contacting customer support to expedite the troubleshooting process.
